Professional Summary

Associate Software Engineer with experience building AI engineering platforms, backend services, and cloud-native applications. Skilled in AI-assisted development, codebase and Jira analysis, automated code review, MCP-based knowledge integration, REST APIs, and database-backed systems using Python, FastAPI, GitLab, Cursor, Kiro, and AWS, with strong foundations in data structures, algorithms, OOP, and DBMS.

Experience

Biz2X **Aug 2026 – Present**

Associate Software Engineer *Noida, Uttar Pradesh*

- Build an internal **AI Engineering Platform** that indexes **400+ company repositories** alongside Jira tickets, analyzes tickets against relevant code and similar historical work items, and generates detailed **Cursor-ready implementation prompts** with an average confidence score of approximately **77/100**.
- Develop cloud execution workflows that provision isolated virtual machines, pull required repositories, execute generated prompts through the **Cursor SDK**, and create **GitLab merge requests**; integrated MR webhooks automatically perform AI-based code analysis and publish review feedback.
- Implement organization-wide AI tool usage monitoring for **Cursor and Kiro** and maintain project-specific knowledge bases for **10+ projects**, exposed through **MCP connectors** for context-aware retrieval during development.

MAQ Software **Jan 2026 – Jul 2026**

Associate Software Engineer Intern *Noida, Uttar Pradesh*

- Developed AI-enabled knowledge retrieval, triage, and escalation workflows for patient intake, reducing intake time by **66.7%** and increasing clinician capacity by **40%**.
- Translated workflow requirements into maintainable backend modules using REST APIs, SQL-driven data access, validation rules, structured responses, and reusable service-layer logic.
- Improved workflow reliability through debugging, exception handling, request validation, technical documentation, and implementation support.

Education

Indian Institute of Information Technology, Sonepat **Nov 2022 – May 2026**

*B.Tech in Information Technology; CGPA: **9.62*** *Sonepat, Haryana*

Projects

O2C Agent – AI-Powered Order-to-Cash Workflow Platform | *Python, FastAPI, PostgreSQL, Ollama, React, MAF*

- Built an AI-assisted workflow automation platform for customer onboarding, KYC handling, order processing, invoice tracking, dispute management, email intake, and human-in-the-loop escalation.
- Designed operational workflow modules achieving **90%** automated order processing across key workflow stages.
- Implemented REST APIs, PostgreSQL data models, JWT authentication, RBAC-secured endpoints, Celery jobs, Redis-backed processing, and Dockerized deployment.

Vanko Bank Application – Cloud-Native Banking Platform | *Angular, Node.js, Express, FastAPI, MongoDB, AWS, Docker, GitLab CI/CD*

- Built a full-stack banking platform supporting onboarding, KYC, account management, transfers, loan origination and servicing, credit assessment, EMI payments, prepayments, and foreclosure using **Angular, Node.js/Express, MongoDB, and Python/FastAPI**.
- Designed and deployed an AWS architecture using **EC2, ECS Fargate, ECR, S3, Lambda, and SQS/DLQ**, supporting KYC extraction, credit-scoring services, and event-driven notifications.
- Implemented **GitLab CI/CD** pipelines for testing, immutable Docker builds, ECR publishing, AWS deployment, and post-deployment verification, with MongoDB transactions and idempotency controls for reliable financial operations.

Technical Skills

Programming & CS: Python, C++, Java, JavaScript, SQL, Data Structures, Algorithms, OOP, DBMS, RDBMS

Generative AI: LLMs, Prompt Engineering, Structured Outputs, Embeddings, Context Windows, AI-Assisted Development

Agents, RAG & MCP: LangGraph, LangChain, RAG Pipelines, Semantic Retrieval, ChromaDB, Knowledge Retrieval, Model Context Protocol

Backend & Databases: FastAPI, Node.js, Express, REST APIs, PostgreSQL, MySQL, SQLite, MongoDB, Redis, JWT, RBAC

Frontend, Cloud & DevOps: Angular, React, AWS, Azure, Docker, Git, GitLab, GitHub Actions, CI/CD, Cursor, Cursor SDK, Kiro

Certifications

Microsoft AI Agent Builder Associate **Microsoft Azure AI Cloud Developer Associate**

Publications

Energy-constrained workflow scheduling for DVFS-enabled heterogeneous systems in cloud computing environments

Scientific Reports, Springer Nature, 2026

Achievements

- **Gold Medalist** in Information Technology, Batch 2022–2026, Indian Institute of Information Technology, Sonepat.
- **Ranked 73rd** in ICPC 2025 Kanpur Regionals; **396th** in ICPC 2025 Preliminary; **431st** in ICPC 2024 Preliminary.
